

***** TRAFFIC ADVISORY *****

Traffic Shift To Occur on Northbound I-77 For Construction of New Lakeview Road Direct Connector Bridge
Detour on I-77 Northbound as Shift is Implemented

Charlotte, N.C. (September 27, 2017) – A traffic shift on I-77 will take place near the Lakeview Road overpass in Charlotte for the beginning of construction of the new Lakeview Road Direct Connector bridge as part of the I-77 Express Lanes project. Crews will shift northbound traffic on I-77 to the east for approximately 4,000 feet. Traffic shift operations will occur overnight from 11:00 p.m. on Friday, September 29 to 5:00 a.m. on Saturday, September 30. This traffic shift will be in place for approximately 10 months. Additional, shorter traffic shifts will also occur in the vicinity of the Lakeview Road overpass in the next few months.

A detour on I-77 northbound will be in place from 11 p.m. this Friday to 5 a.m. on Saturday to allow crews to safely implement this traffic shift. During the detour, motorists travelling northbound on I-77 will take I-85 north to the I-485 outer loop. Once on I-485, drivers will be directed approximately six miles to the I-77 Huntersville entrance ramp to continue travelling northbound on I-77. Please be advised that the entrance ramp to I-77 North from Sunset Road will be temporarily closed during the hours of the detour. The northbound ramp at W.T. Harris Boulevard will remain open to traffic

Please see attached detour map.

Construction of the new direct connector bridge will occur in phases. The new half of the Lakeview Road director connector bridge will be built first. Crews will then take down the existing bridge in order to build the second half of the new bridge. Once completed, the new director connector bridge will feature two lanes in each direction, a dedicated turning lane onto the I-77 Express Lanes in each direction, and bike lanes and sidewalks for improved connectivity.

Motorists are encouraged to pay attention when approaching the work zone, obey the posted speed limit and work zone signs, and allow extra time to reach their destinations safely.

We encourage people to sign up for our e-newsletter and follow us on social media, using the following:

Once the project is complete, dedicated express lanes will run adjacent to the existing general purpose lanes. The number of general purpose lanes will remain the same as today. Drivers will have the choice of using the express lanes to avoid travel delays, the general purpose lanes or a combination of both. Vehicles with three or more occupants (including the driver) and equipped with a transponder may use the express lanes for free. The full 26-mile project is slated to be completed in 2018.
