### **TESTING OF ELECTRONIC SIGNS BEGINS ON I-77 EXPRESS**

**Charlotte, N.C. (March 22, 2019)** – Testing of electronic signs on I-77 between I-485 and Mooresville will begin the week of March 25. Motorists will see the digital message signs on the right-hand side of the road with rotating messages that read “EXPRESS LANES ARE CLOSED” and “TEST.”

The toll signs above I-77 Express will also be tested. The toll signs will display numbers to conduct this testing. Drivers may also see test-related vehicles in I-77 Express as this testing is occurring. Each entrance onto I-77 Express will continue to be closed and blocked as the lanes are not in service during this testing period.

I-77 Express will open in sections, with the northern portion between Hambright Road in Huntersville and Exit 36 in Mooresville slated to open soon. When the northern section of the project opens, customers will receive a 25 percent promotional rate off tolls until the entire roadway opens.

To receive traffic advisory information and the latest information on the project, we encourage people to sign up for our e-newsletters: <https://www.i77express.com/about-us/contact-us/>
